1. Introduction and Scope of Application

Pillar III disclosure is a requirement of the European Union's Capital Requirements Regulation 575/2013 and Directive 2013/36/EU, as implemented by CySEC Directives 144-2014-14 and 144-2014-15 (where applicable) and Law 87(I)/2017 (the "Law"). Pillar III aims to encourage market discipline by developing a set of disclosure information, which gives access to market participants, regarding to the Company's capital adequacy and to each material category of risk it faces. Additionally, it aims to provide information regarding the risk assessment and the risk mitigation process which was followed by the Company during 2017.

According to Basel III regulations, there are three pillars, which are designed to promote market discipline through the disclosure of important financial information regarding the risk exposures of the Company and of the risk management process followed.

The current regulatory framework consists of three pillars:

Pillar I: Sets out the minimum capital requirements for the Company to be able to cover the credit risk, market risk and operation risk.

Pillar II: Sets out the supervisory review which requires the regulators to undertake a qualitative review of the Company's capital allocation techniques (ICAAP) and compliance with the relevant standards.

Pillar III: Sets out the required disclosures to allow market participant to gain access and better understand the risk profile of the Company, to assess/review important information of the capital structure, risk exposures, the risk management process followed and most important the capital adequacy of the Company.

The Board of Directors and Senior Management are responsible for establishing and maintaining an effective internal control structure over the disclosure of financial information, including Pillar 3 disclosures.

The Pillar III Disclosures report was approved by the Board of Directors on 25th June 2021.

1.1 Reporting Details

The Company reports on a Solo basis and the reporting currency is USD.

1.2 Non-Material, Proprietary or Confidential Information

This document has been prepared to satisfy the Pillar III disclosure requirements set out in the CRR. The Company does not seek any exemption from disclosure on the basis of materiality or on the basis of proprietary or confidential information.

Definitions:

- Magic Compass Ltd: the “Company”,
- Cyprus Securities and Exchange Commission: “CySEC”
- DI144-2014-14 and DI144-2014-15 of the Cyprus Securities and Exchange Commission and Regulation 575/2013 and Directive 2013/36/EU of European Commission for the Prudential Supervision and Capital Requirements of Investment Firms: the “Directives”.
- Frequency: The Company will be making these disclosures annually.
- Media and Location: The disclosure will be published on our website: www.magiccompass.com
- Scope of report: The disclosures are in accordance to the audited financial statements of the Company for the year ended 31 December 2020. The information contained in the Pillar III Market Discipline and Disclosure report is verified by the Firm’s external auditors.

2. Business Background

The Company was incorporated in Cyprus on 16th of March 2015, as a limited liability company under the Cyprus Companies Law, Cap. 113. Magic Compass Ltd is a licensed Cyprus Investment Firm regulated by the Cyprus Securities & Exchange Commission (CySEC) with license number 299/16.

2.1 Group Structure

The Company does not belong in any kind of group and it operates on a solo basis.

2.2 Services offered by the Company

Magic Compass Ltd obtained an Investment Firm authorization from the Cyprus Securities and Exchange Commission (CySEC) to offer:

Investment Services:

1. Reception and transmission of orders in relation to one or more financial instruments
2. Execution of Orders on Behalf of Clients
3. Dealing on own account.
4. Portfolio Management

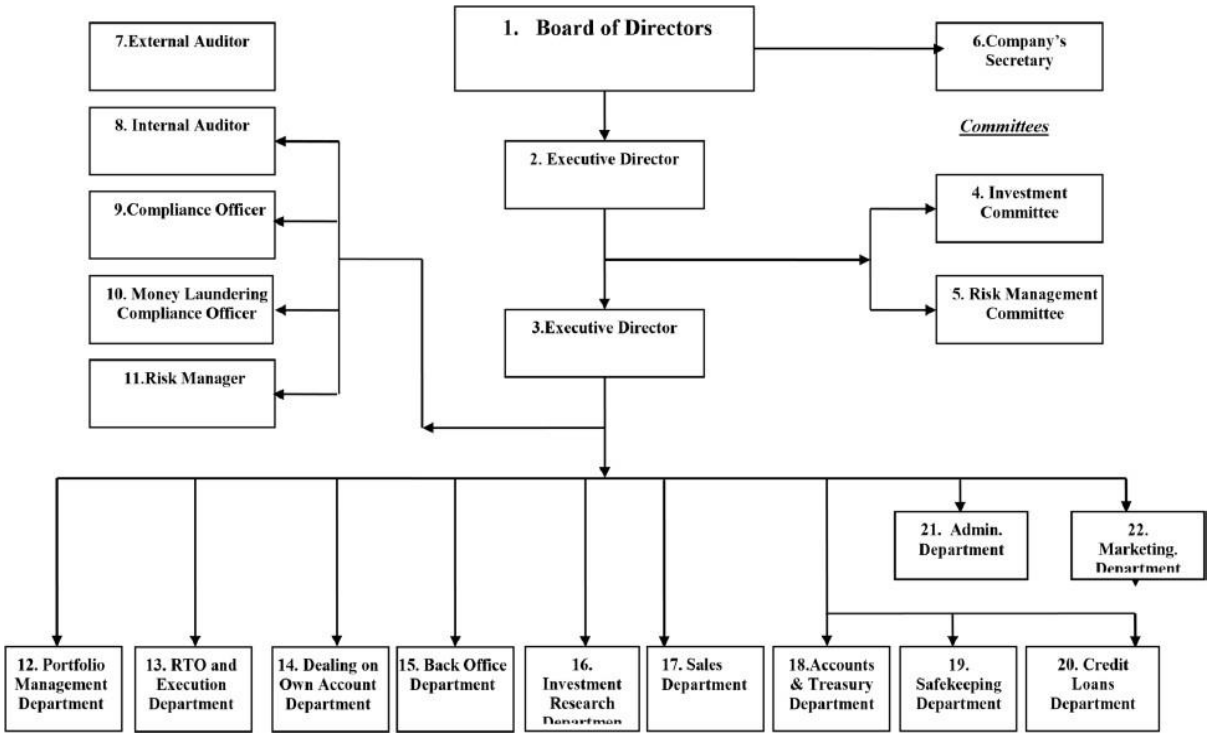

Ancillary Services:

1. Safekeeping and administration of financial instruments for the account of clients, including custodianship and related services such as cash/collateral management
2. Granting credits or loans to an investor to allow him to carry out a transaction in one or more financial instruments, where the firm granting the credit or loan is involved in the transaction (please remove if not applicable)
3. Foreign exchange services where these are connected to the provision of investment services
4. Investment research and financial analysis or other forms:

3. Corporate Governance of the Company

3.1 Corporate Governance

Diagram of Organizational Structure

Board of Directors

The Board assesses and periodically reviews the effectiveness of the policies, arrangements and procedures put in place to comply with the obligations under the Law, and to take appropriate measures to address any deficiencies, set the strategy of the Company. The Board is responsible for the monitoring of the internal control mechanisms of the Company to enable prevention of activities outside the scope and strategy of the Company and the prevention of any unlawful transactions, the identification of risks, and the timely and adequately flow of information.

All the supervisory functions (i.e. Compliance, AML Compliance, Risk Management and Internal Audit) of the Company have an open line of communication with the Board in order to communicate any findings and/or deficiencies they identify in a timely manner and ensure that those will be resolved through the guidance of the management body. In addition, the Risk Management and Investment Committees are communicating their suggestions and findings to the Board, as and if necessary.

Full name of Director	Position/Title / Capacity	Country
Antranik Boyajian	CEO, Executive Director, "4 eyes"	Cyprus
Iordanis Grigoriou	General Manager, Executive Director, "4 eyes"	Cyprus
Christophoros Tengeris	Non-executive Director, Independent	Cyprus
Yiannis Papazacharia	Non-executive Director, Independent	Cyprus
Binying Chen	Non-executive Director, Dependent	Cyprus

1. Risk Management Function:

The Risk Manager ensures that all the different types of risks taken by the Company are in compliance with the Law and the obligations of the Company under the Law, and that all the necessary procedures, relating to risk management are in place. The Risk Manager shall report to the Senior Management of the Company.

As an addition to the above, the Company is operating a Risk Management Committee, which is responsible for monitoring and controlling the Risk Manager in the performance of his duties. Also is formed with the view to ensure the efficient management of the risks inherent in the provision of the investment services to Clients as well as the risks underlying the operation of the Company.

- 2. Compliance Function:** The Compliance Officer of the Company has the required knowledge and expertise in order to perform his duties effectively. Moreover, the duties of the Compliance Officer are to establish, implement and maintain adequate policies and procedures designed to detect any risk of failure by the Company to comply with its obligations, and put in place

adequate measures and procedures designed to minimize such risk and to enable the competent authorities to exercise their powers effectively.

- 3. Internal Audit Function:** The Internal Auditors review and evaluate the adequacy and effectiveness of the Company's systems of internal controls and the quality of operating performance when compared with established standards on an ongoing basis. The recommendations that the Internal Auditor makes to the Senior Management and the Board regarding the internal controls and the management of the various risks that are associated with the operations, aim to secure a controlled environment in the Company.

4. Anti-Money Laundering Compliance Officer

Anti-Money Laundering Officer reports directly to the Board of Directors and is responsible for:

- Ensuring implementation of the procedures described in the Company's AML Procedures Manual
- Ensuring that Company employees attend training sessions on anti-money laundering and terrorist financing procedures
- Ensuring that all clients' accounts must be opened only after the relevant pre-account opening due diligence and identification measures and procedures have been conducted, according to the principles and procedures set in the AML Manual
- Compliance with high standards of anti-money laundering (AML) practice in all markets and jurisdictions in which the Company operates
 - Ensuring the implementation of the "know your client" procedures of the Company
 - Gathering information with regards to the new customers of the Company
 - Analysing the customers' transactions
 - Continuous improvement of the existing control procedures
 - Providing a written annual report to the Board of Directors on the matters of own responsibility, indicating in particular whether the appropriate remedial measures have been taken in the event of any deficiencies.

The corporate governance of the Company regarding risk management is considered adequate through the establishment of an effective risk oversight structure. The internal organisational controls are in place to safeguard that the Company accelerate the ability to identify, assess and mitigate the relevant risks. Also, the aim of the Company and in general the risk management function is to quickly recognize potential adverse events, be more proactive and forward looking and establish the appropriate risk responses were deemed necessary and at all times to comply with the relevant legislation

3.2 Recruitment Policy

Recruitment of Board members combines an assessment of both technical capability and competency skills referenced against the Company's regulatory and operational framework. It seeks to resource the specific experience and skills needed to ensure the optimum blend (diversity) of individual and aggregate capability having regard to the Company's long-term strategic plan.

The persons proposed for appointment to the Board should commit the necessary time and effort to fulfil their obligations. Prior to their appointment the proposed persons should obtain the approval of the Commission. Main factors influencing the decision to propose the appointment of potential Directors include:

- Integrity and honesty;
- High business acumen and judgment;
- Knowledge of financial matters including understanding of financial statements and important financial ratios;
- Knowledge and experience relevant to financial institutions;
- Risk Management experience; and
- Specialized skills and knowledge in finance, accounting, law, or related subject.

3.3 Number of Directorships held by members of the Board

As per Article 9(4) of the Law, the numbers of directorships which may be held by a member of the Board of Directors at the same time shall take into account individual circumstances and the nature, scale and complexity of the CIF's activities. Unless representing the Republic, members of the Board of Directors of a CIF that is significant in terms of its size, internal organization and the nature, the scope and the complexity of its activities shall not hold more than one of the following combinations of directorships at the same time:

- a) One executive directorship with two non-executive directorships;
- b) Four non-executive directorships

In addition to the above, the following shall count as a single directorship:

- a) executive or non-executive directorships held within the same group
- b) executive or non-executive directorships held within:
 - (i) institutions which are members of the same institutional protection scheme, provided that the conditions set out in Article 113, paragraph (7) of Regulation (EU) No 575/2013 are fulfilled; or
 - (ii) undertakings (including non-financial entities) in which the CIF holds a qualifying holding.

The Board members of the Company hold the following directorships to other entities:

Full name of Director	Position / Title / Capacity	# Executive	# Non-Executive
Antranik Boyajian	CEO, Executive Director, “4 eyes”	0	0
Iordanis Grigoriou	General Manager, Executive Director, “4 eyes”	0	0
Christophoros Tengeris	Non-executive Director, Independent	0	2
Yiannis Papazacharia	Non-executive Director, Independent	0	1
Binying Chen	Non-executive Director, Dependent	0	0

3.4 Diversity Policy

Diversity is increasingly seen as an asset to organizations and linked to better economic performance. It is an integral part of how we do business and imperative to commercial success. The Company recognizes the value of a diverse and skilled workforce and is committed to creating and maintaining an inclusive and collaborative workplace culture that will provide sustainability for the organization into the future.

The Company recognizes the benefits of having a diverse Board of Directors which includes and makes use of differences in the skills, experience, background, race and gender between directors. A balance of these differences will be considered when determining the optimum composition of the Board of Directors.

3.5 Risk Management Committee

The Company, due to its size, scale and complexity has established a Risk Management Committee in order to better handle the risks that arise from its operations.

The Risk Management Committee is a committee appointed by the Board of Directors to review the Company's system of risk management. The Risk Management Committee is formed with the purpose of ensuring the efficient management of the risks inherent in the provision of the investment services to Clients as well as the risks underlying the operation of the Company.

The Risk Management Committee, which reports directly to the Board of Directors, consists of 5 participants.

The role of the Risk Management Committee is essential to:

- ensure the efficient management of the risks inherent in the provision of the investment services to clients;
- monitor the risks underlying the operation of the Company;

- be responsible for monitoring and controlling the associated risks;
- identifying additional risks that the Company is/may exposed to;
- sets and monitors risk limits and other mitigation measures;
- evaluates the adequacy and effectiveness of controls in place for managing the risks;
- adopts necessary actions;

The Risk Management Committee bears the responsibility to monitor the adequacy and effectiveness of risk management policies and procedures that are in place, the level of compliance by the Company and its relevant persons with the policies and procedures adopted, as well as the adequacy and effectiveness of measures taken to address any deficiencies with respect with those policies and procedures that are in place, including failures by the Company’s relevant persons to comply with those policies and procedures.

3.6 Reporting and Information Flow

The Company has established a risk-related informational flow to the Board of Directors to be in line with the requirements set out in the Law and subsequent Directives. Details of the major reports submitted to the Board are presented in the table below:

Report Name	Report Description	Owner	Recipient	Frequency
Risk Management Report	Annual Risk Management Report	Risk Manager	BoD, CySEC	Annual
Compliance Report	Annual Compliance Review	Compliance Officer	BoD, CySEC	Annual
Internal Audit Report	Annual Internal Audit Review	Internal Auditor	BoD, CySEC	Annual
Financial Statements	Audited financial statements of the Company	External Auditor	BoD, CySEC	Annual
Pillar III Report	Disclosures regarding risk management, capital adequacy and risk exposures of the Company	Risk Manager	BoD, CySEC, Public	Annual
ICAAP Report	Internal Capital Adequacy Assessment Process	Risk Manager, Compliance Officer, Head of Accounting	BoD, CySEC	Annual
Capital Adequacy Reports	Capital requirement calculation	Senior Management, Head of Accounting	Senior Management, CySEC	Quarterly

4. Risk Management

Risk Management is "the systematic application of management policies, procedures and practices to the tasks of establishing the context, identifying, analyzing, assessing, treating, monitoring and communicating".

It is an iterative process that, with each cycle, can contribute progressively to organizational improvement by providing management with a greater insight into risks and their impact.

There is a formal structure for monitoring and managing risks across the Company comprising of detailed risk management frameworks (including policies and supporting documentation) and independent governance and oversight of risk.

To ensure effective risk management the Company has adopted the “three lines of defense” model of governance with clearly defined roles and responsibilities.

First line of defense: Managers are responsible for establishing an effective control framework within their area of operations and identifying and controlling all risks so that they are operating within the organizational risk appetite and are fully compliant with Company policies and where appropriate defined thresholds.

Second line of defense: the Risk Management Function is responsible for proposing to the Board appropriate objectives and measures to define the Company’s risk appetite and for devising the suite of policies necessary to control the business including the overarching framework and for independently monitoring the risk profile, providing additional assurance where required. Risk will leverage their expertise by providing frameworks, tools and techniques to assist management in meeting their responsibilities, as well as acting as a central coordinator to identify enterprise wide risks and make recommendations to address them.

Third line of defense: comprises the Internal Audit Function which is responsible for providing assurance to the Board and senior management on the adequacy of design and operational effectiveness of the systems of internal controls

4.1 Risk Management Process

The Company adopted and implemented its risk management process in order to create a robust and standardized procedure to manage each identified risk. The risk management process is an on-going and cyclical process which enables the Risk Management function to set the risk tolerance levels and also how the risks will be identified, assessed, controlled and managed.

The risk management cyclical process of the Company contains six steps which every one of them has its significance. All the steps need to be considered, in order to apply an appropriate and effective risk management process for each risk exposure.

Continuous Risk Management Process

Step 1 – Set Strategy/Objectives

At the board level, strategic risk management is a necessary core competency. The Company should set, approve and establish risk management strategy/objectives regarding its risk appetite/tolerance levels in order to proceed with the appropriate action for each identified risk exposure. The Senior Management and the Board of Directors should take a proactive approach in order to achieve the Company's goal to further develop the risk management capabilities. By establishing appropriate strategies and objectives regarding risk exposures, the Company will avoid unpleasant events which may harm its operations.

Step 2 – Risk Identification

Without clear objectives it is impossible to identify events that might give rise to risks that could impede the accomplishment of a particular strategy or objective. Risk identification is the most important process in the risk management planning. Risk identification determines which risks might affect the operations of the Company. While each risk captured, it is important for senior management and the Board of Directors to focus and prioritized on the key risks. This prioritization is accomplished by performing the risk assessment. The risk identification process is performed on an-ongoing basis in order to safeguard the operations of the Company to upcoming disrupting events. There are some techniques for identifying risk such as the brainstorming, SWOT analysis, scenario analysis, facilitated workshops etc. The risks that may be identified, include, but are not limited to, credit, market, operational, conduct, reputational and compliance risk.

Step 3 – Risk Assessment

The first activity within the risk assessment process is to develop a common set of assessment criteria to be deployed across business units and corporate functions. Assessing risks consists of assigning values to all the identified risk exposures of the Company. Thus, the risk assessment is performed by considering the probability of a risk occurrence and the impact of this risk on the achievement on the set objectives.

However, risks do not exist in isolation. Often there are risk interactions, which at the beginning a risk exposure may be seen as insignificant, but as they interact with other events and conditions, they may cause great damage to the Company's operation.

Step 4 – Risk Response

The results of the risk assessment process then serve as the primary input to risk responses whereby response options are examined according to the risk appetite of the Company. The main objective of the Company is to mitigate the risk exposures affecting its operations, whatever their risk category. For example, if the impact of a risk is considered as high, then an immediate action should be taken. For each risk category, there is an appropriate response. Each risk and related response should be assigned to the manager who is responsible for the area affected by the risk. The action taken to respond to a risk exposure should be determined and documented which is an essential part of the risk response process.

Step 5 – Risk Control

Having identified the risk exposures of the Company, assessed them and the appropriate response has been determined, then the Risk Manager has to review the existing controls and all hazards must be managed before harm the operations of the Company. The management of risks in the Company requires mitigating risks so far as reasonably practicable. All risk exposures that have been assessed should be dealt with, in order of priority. The most effective control options should be selected to mitigate risks. The hierarchy of controls is determined by the category of each risk exposure according to the Risk Matrix of the Company (see Table 3). This should be used to determine the most effective controls.

An essential component of the risk assessment is to first set a benchmark for the Company's Risk Appetite. The Company's risk appetite is governed firstly by the regulatory requirements imposing the Company to have at least an 8% Capital Adequacy ratio, and in all cases to have own funds more or equal to the sum of its capital requirements, and more than the Company's initial capital.

The Company accepts risks rated A and B while risks having a score C and D are interpreted as material and are considered to fall outside the Company's Risk Appetite. In such cases, further analysis is undertaken, on whether additional capital or controls are more appropriate to be added, so as for the risk to be mitigated and returned into the Company's risk appetite.

Step 6 – Communicate and Monitor

Risk identification, risk assessment, risk response and control are an on-going process. Therefore, regularly review the effectiveness of Company’s risk assessment and control measures is an essential part of the risk management function. The Risk Manager has to ensure that the significant risks remain within the acceptable risk levels that emerging risks and gaps are identified and that risk response and control activities are adequate and appropriate. Indicators that fall outside of acceptable risk levels should be escalated with appropriate action plans to bring the risk back within established risk levels. Those risks that still remain above acceptable risk levels should be considered by the Board for their approval of any necessary resolution strategies. This activity will form the basis for reporting to the Board and on-going monitoring by management.

The monitoring process is an essential part of the risk management activities, which creates a “safety net” on the operations of the Company. Thus, the Risk Management Committee and the Internal Audit of the Company play an important oversight role in confirming that management is monitoring and managing risks in accordance with established levels. The Risk Manager shall communicate to the senior management and the Board of Directors, the findings of each committee regarding the risk exposures in order to mitigate them which is the main objective of the Company.

The level of risk is analyzed by combining estimates of likelihood (table 1) and consequences (table 2), to determine the priority level of the risk (table 3).

The Risk Register is discussed and finalized during a Risk Management Committee’s meeting whereby the Senior Management has the opportunity to elaborate on the identified risks and comment on their materiality, as well as the overall methodology of the risk assessment. The Risk Register will be reviewed at least annually by the Risk Management Committee and the Senior Management.

The Company undertakes Sensitivity Analyses and performs Stress Tests on the most significant (i.e. material) risks identified; thus, it obtains a forward looking view of the potential adverse results the risks may potentially have on the Company’s Balance Sheet and Income Statement.

The Company has adopted a robust internal governance framework on the basis of which the Company’s processes and procedures are governed on a daily basis, and which, combined with additional capital, where deemed necessary, ensures the mitigation of risks within the Company.

Table 1: Probability of Risk Occurring

Score Level	Description	Frequency
6	Certain to occur	Occurs Monthly
5	Expected/likely to occur	At the once Quarterly
4	Frequent	Quarterly to Annually
3	Occasionally	Every 1-5 years
2	Unlikely	Every 5-20 years
1	Rare	Every 20 years or more

Table 2: Financial Impact of Risk

Score Level	Risk Scale	Financial Impact (yearly in USD)
1	Minor/Low/Insignificant	0-10.000
2	Moderate/Medium	10.001-50.000
3	High	50.001-100.000
4	Major	100.001-150.000
5	Critical	150.001-200.000
6	Catastrophic	>200.001

Table 3: Probability/ Impact Matrix

Probability of Risk	Impact of Risk					
	1	2	3	4	5	6
6	B	C2	C3	D1	D2	D3
5	B	C1	C2	C3	D1	D2
4	B	B	C1	C2	C3	D1
3	B	B	B	C1	C2	C3
2	A	B	B	B	C1	C2
1	A	A	B	B	B	B

5. Regulatory Pillar 1 Risk Management

5.1 Credit Risk

Credit Risk arises when counterparties fail to discharge their obligations towards the Company, thus reducing the amount of future cash inflows from the financial assets at hand on the Company’s balance sheet. In particular, the Company has specific credit risks arising from its current banking and/or brokerage accounts with credit and other financial institutions, as well as other credit risks stemming from financial (i.e. corporate) assets and assets held under the Investor Compensation fund.

Counterparty credit risk arises from credit exposures arising from open trading positions and is the principle driver of the total credit risk exposure.

Risk Mitigation Policies:

- Ensures that client’s and own funds are well diversified;
- Regularly assesses the appropriateness of reallocation of funds where a credit institution fails in quality and there is a lack of belief in its reliability; the company monitors and reviews on systematic basis credit ratings from bond credit rating institutions like Moody’s Investors Service;

- Due diligence procedures are followed for all credit institutions, investment firms and payment service providers with whom the Company maintains accounts and ensures that the said providers are licensed/regulated by a competent authority of a Member State or a third country;
- Ensures that clients fund their accounts prior to the commencement of trading in financial instruments and that sufficient cash margin has been deposited before a market position is opened. Also, it monitors all trading accounts through an automated process that highlights trading accounts approaching or entering into a Margin Call and Stop-out.

Credit Risk Analysis

The Company implements the Standardised Approach to quantify the Credit Requirements, which correspond to the credit risks that it faces.

The below tables summarize the credit exposure of the Company by asset class and by risk weight as at 31 December 2020:

Table 4: Credit Risk Capital Requirements by Asset Class

Asset class	Exposure value \$000	Risk Weighted Exposure \$000	Minimum Capital Requirements \$000
Institutions	900	352	28
Corporates	10	10	1
Retails	-	-	-
Other items	255	254	20
Total	1,165	616	49

Table 5: Breakdown of exposures by risk weight

Risk Weight	\$000
= 0%	1
> 0 and ≤ 12%	-
> 12 and ≤ 20%	656
> 20 and ≤ 50%	47
> 50 and ≤ 75%	-
> 75 and ≤ 100%	461
> 100 and ≤ 425%	-
> 425 and ≤ 1250%	-
Grand Total	1,165

5.2 Market Risk

Market Risk is defined as the risk of financial loss resulting from changes in market factors which reduce the Market Value of the financial instruments trading portfolio, as well as the risk of financial loss due to foreign currency movements.

The following processes and measurement techniques are followed by Magic Compass Ltd as follow:

- Applies a *mark to market* valuation, for accounting purposes.
- Sets the maximum loss that may be incurred, due to a client's trading activity at a certain level whereupon full hedging procedures should commence.
- Employs, on a full time basis, a Risk Manager.
- Records, through its trading platform(s) and real time reporting tool, the clients' trading activity including but not limited to the transactions that are executed; this gives the option to constantly monitor the Firm's exposure and take appropriate action, if required.
- It is the responsibility of the Head of the Execution Department, or the supervisor of the Execution Department in his/ her absence, and the Risk Manager to ensure that Magic Compass Ltd maintains, at all times, sufficient funds in its multiple hedging accounts to offset, if required, any exposure. The Head of the Execution Department, or the supervisor of the Execution Department, shall inform the *Board of Directors*, accordingly.
- In case of an extraordinary event the Head of the Execution, or the supervisor of the Execution Department in his/ her absence, is responsible for taking all required measures to ensure the safeguard of the best interests of Magic Compass Ltd and its clients. The Head of the Execution, or the supervisor of the Execution Department in his/ her absence, shall oversee the implementation of a business continuity plan, if required.

Magic Compass Ltd follows the Standardised Approach for Market Risk. In accordance with the Standardised Approach, the Market Risk capital requirements are calculated with respect to Position Risk, Commodities Risk and Foreign Exchange Risk.

Exposure to Market Risk

Magic Compass Ltd Market Risk arises from exposures to price, currency and interest rate risk, as well as from the cash notional positions arising from the trading of CFDs.

I. Price Risk

The Company is exposed to market price risk from fluctuations in foreign currencies, commodities and equity securities due to the open CFD positions which are held by the Company as counterparty to its customers and other third parties, and classified on the Statement of Financial Position as derivative financial instruments. The Company itself does not take proprietary positions based on expected market movements. However, not all net client exposures are hedged

and, as a result, the Company may have a residual net position in any of the underlying currencies, commodities or equities, it offers.

To manage its price risk, the Company has a Risk Policy set by the Board of Directors, which includes limits for every single financial market in which the Company trades. These limits determine the net exposure arising from client activity and hedging which the Company is prepared to accept. The Risk Management function continually monitors the Company's exposures against these limits. If the Company's exposure exceeds these limits, then the Company will carry out sufficient hedging to bring the exposure back within the approved limits. For this purpose, the Company maintains trading (hedging) accounts with other regulated financial institutions for engaging in proprietary positions in financial instruments when a need to hedge arises.

II. Foreign Exchange Risk

The Company operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US dollar. Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency other than the Company's functional currency (US dollar).

The Company's Management, as well as the Risk Management function, monitor exchange rate fluctuations on a continuous basis.

III. Cash flow and fair value interest rate risk

The Company's cash flow interest rate risk arises from its trading activities and more specifically from the interest charged on the derivative financial instruments (both assets and liabilities) that remain open overnight. In addition, cash flow interest rate risk arises on the cash and cash equivalents held at variable interest rates. Other financial assets and liabilities held at fixed interest rates expose the Company to fair value interest rate risk, however this risk is insignificant to the Company as these assets/ liabilities are not material.

5.3 Operational Risks

Operational risk is defined as the risk of a direct or indirect impact resulting from human factors, inadequate or failed internal processes and systems, or external events. Operational risk includes, inter alia, actual and/or potential losses caused from deficiencies in the Company's set-up of operations, including but not limited to, system integrity and reliability, employee fraud, weaknesses in personnel appointment, organizational structure and internal communication inefficiencies.

The Company's exposure to operational risk is limited to the extent of its current scale and complexity. The Company has a comprehensive framework with a common approach to identify, assess, quantify, mitigate, monitor and report operational risk. Overall planning, coordination, and

monitoring is centralized, however, most operational risks are managed within the departments in which they arise.

In addition to its overall framework, in order to mitigate operational risks, the Company has specific processes and systems in place to focus continuously on high priority operational matters such as information security, managing business continuity and combating fraud.

Magic Compass Ltd adopted the Basic Indicator Approach (“BIA”) for calculating its Operational Risk capital requirements. Under the Basic Indicator Approach, the capital requirement is equal to 15% of the relevant indicator, the relevant indicator being the three-year average of the sum of gross income. The three-year average is calculated based on estimates made in the Business Plan of the Company.

6. Other risks not covered in Pillar 1

6.1 Liquidity Risk

Liquidity risk is the risk that the Company may not have sufficient liquid financial resources to meet its obligations when they fall due, or would have to incur excessive costs to do so. The Company’s policy is to maintain adequate liquidity and contingent liquidity to meet its liquidity needs under both normal and stressed conditions. To achieve this, the Company monitors and manages its liquidity needs on an ongoing basis. The Company also ensures that it has sufficient cash on demand to meet expected operational expenses. This excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters. Currently the Company is subject to liquidity risk however it takes all necessary steps to mitigate this risk and meet all its obligations which currently is achieved.

6.2 Strategic Risk

Strategic risk corresponds to the unintended risk that can result as a by-product of planning or executing the strategy. A strategy is a long-term plan of action designed to allow the Company to achieve its goals and aspirations. Strategic risks can arise from:

- Inadequate assessment of strategic plans;
- Improper implementation of strategic plans; or
- Unexpected changes to assumptions underlying strategic plans.

Risk considerations are a key element in the strategic decision-making process. The Company assesses the implications of strategic decisions on risk-based return measures and risk-based capital in order to optimize the risk- return profile and to take advantage of economically profitable growth opportunities as they arise.

6.3 Reputation Risk

Reputational risk can arise from direct Company actions or by actions of third parties that it may or may not have a relationship with. Such Company actions may include internal security breaches, employee fraud, client misinformation, mistakes in handling client requests and any other actions that can lead to significant negative public opinion and subsequently loss of business and income. Third party actions can include problems with the provision of the outsourced services that can lead to operational interruptions, database hosting and security, spreading of rumors and unsubstantiated information.

The Company strives to preserve its reputation by adhering to applicable laws and regulations, and by following the core values and principles of the Company, which includes integrity and good business practice. The Company centrally manages certain aspects of reputation risk, for example communications, through functions with the appropriate expertise. It also places great emphasis on the information technology security which is one of the main causes of such reputational risk manifestation.

6.4 Business Risk

This includes the current or prospective risk to earnings and capital arising from changes in the business environment including the effects of deterioration in economic conditions. Research on economic and market forecasts are conducted with a view to minimize the Company's exposure to business risk. These are analyzed and taken into consideration when implementing the Company's strategy.

6.5 Capital Risk

This is the risk that the Company will not comply with capital adequacy requirements. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders. The Company has a regulatory obligation to monitor and implement policies and procedures for capital risk management. Specifically, the Company is required to test its capital against regulatory requirements and has to maintain a minimum level of capital. This ultimately ensures the going concern of the Company.

The Company is further required to report on its capital adequacy on a regular basis and has to maintain at all times a minimum capital adequacy ratio which is set at 8%. The capital adequacy ratio expresses the capital base of the Company as a proportion of the total risk weighted assets. Management monitors such reporting and has policies and procedures in place to help meet the specific regulatory requirements, however this is not achieved at all times on time but at a later stage.

6.6 Regulatory Risk

This may arise as a result of negligent actions by the Company's Senior Management and / or staff members, and may lead to fines, loss of license and / or other form of disciplinary action by the regulatory authority. As a result, the Company's reputation will be adversely affected.

The Company maintains strong compliance / internal audit departments, which perform frequent inspections on the Company's processes and procedures. Should a non-compliance issue arise, all appropriate measures are immediately taken to rectify the issue. Both the compliance officer and the internal auditor are qualified and well trained, and remain abreast with any new regulatory developments. The potential of such risk arising is considered low.

6.7 Legal and Compliance Risk

The Company may, from time to time, become exposed to this type of risks, which could manifest because of non-compliance with local or international regulations, contractual breaches or malpractice.

The probability of such risks manifesting is relatively low due to the detailed internal procedures and policies implemented by the Company and regular reviews performed by the compliance officer. Additionally, the management consists of individuals of suitable professional experience, ethos and integrity, who have accepted responsibility for setting and achieving the Company's strategic targets and goals. In addition, the Board meets regularly to discuss such issues and any suggestions to enhance compliance are implemented by management. From the Company initiation until the date of this report no legal or compliance issues arose. Any changes to local, EU and third country Regulations, Directives, and Circulars are being constantly monitored and acted upon ensuring that the Company is always compliant with them.

6.8 Concentration Risk

This includes large individual exposures and significant exposures to companies whose likelihood of default is driven by common underlying factors such as the economy, geographical location, instrument type etc. No such concentration risk exists.

6.9 Information technology Risk

Information technology risk could occur because of inadequate information technology security, or inadequate use of the Company's information technology. For this purpose, policies have been implemented regarding back-up procedures, software maintenance, hardware maintenance, as well as use of both hardware and software intrusion aversion measures such as (but not limited to) firewalls, anti-virus software, use of security keys, access restrictions, network fencing, and encryption techniques. Materialization of this risk has been minimized to the lowest possible level given the Company's current complexity of its operations and the services it offers to its clients.

7. Capital Requirements

The Company's objectives in managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital.

The Company is required to report on a quarterly basis its capital adequacy and has to maintain at all times a minimum capital adequacy ratio which is at 8%. The capital adequacy ratio expresses the capital base of the Company as a proportion of the total risk weighted assets. The Senior Management and the Accounting Department monitor the reporting obligation and put in place policies and procedures in order to meet the relevant regulatory requirement.

For the calculation of Credit Risk and Market Risk capital requirements, under Pillar 1, the Company uses the Standardised Approach whereas for the purposes of Operational Risk, the Basic Indicator Approach is used.

The total Capital Requirements as at 31 December 2020 are shown in the table 6 below:

Table 6: Capital Adequacy Ratio

Capital Adequacy Ratio	\$000
Risk Weighted Assets Exposure:	
Credit Risk – Own Fund requirements	49
Market Risk – Own Fund requirements	29
Operational Risk – Own Fund requirements	-
Total Capital Requirements	78
Total Eligible Own Funds	1,003
Capital Adequacy Ratio	103.33%
Minimum Capital Adequacy Ratio	8%

The Capital Adequacy ratio of the company for the year ended 31 December 2020 is 103.33% which is higher than the minimum required which is 8%.

The Company's Eligible Own Funds includes only Original Own Funds (Tier 1 Capital). Tier 1 capital is a core measure of a Company's financial strength from a regulator's point of view. It is composed of share capital, share premium and reserves (excluding revaluation reserves) including the profits and losses brought forward as a result of the application of the final profit or loss. In addition, the own funds of the Company as at 31 December 2020 were higher than the minimum amount required by the legislation.

The table 7 below presents the Company's capital base as at 31 December 2020:

Table 7: Eligible own Funds

As at 31 December 2020:	\$
Share Capital	1,339,371
Share Premium	2,582,064
Accumulated losses	-2,826,416
Advances from shareholders	-
Total Equity	1,095,019
Other Deductions:	
Intangible Assets	-
Investors Compensation Fund	91,575
Total Deductions	91,575
Total Eligible Own Funds	1,003,444

8. Disclosure regarding the remuneration policy and practices

The Company's Board of Directors is responsible for the adoption, periodic review and implementation of the Company's Remuneration Policy based on Part Eight of Regulation (EU) No 575/2013 of the European Parliament.

The Company's Remuneration Policy fulfils the Company's obligation under Part Eight of Regulation (EU) No 575/2013 of the European Parliament. Responsible body for the implementation of the Company's Remuneration Policy shall be the Board of Directors. The responsibility of the Board is to prepare the decisions regarding the Remuneration Policy, including those which have implications for the risk and risk management of the Company and to table the said decisions or proposals for final deliberation. Additionally, the Compliance Officer of the Company is advising the Board regarding remuneration matters in order to ensure that any developments in the regulation will be implemented by updating the remuneration policy of the Company accordingly to comply with the provisions of the relevant legislation.

During the year 2020, the remuneration of staff consisted of a fixed component only with no variable element. The remuneration of each individual varies and depending from position, education, experience, performance, accountability and responsibility.

9. Additional information

Following the outbreak of COVID-19 in Cyprus, the Firm has taken the required measures to ensure that its employees have access to its technology infrastructures necessary for the completion of their tasks and that additional systems for critical functions are being provided.

During 2020, the Company has updated and tested the business continuity policy. Employees are able to work from home efficiently and with no disruption during COVID lock down period and thus the overall risk from COVID-19 crisis has been decreased significantly.

Finally, the Company faced no negative impact in its financial position as a result of the pandemic.
